EDUCATION

Indian Institute of Technology (IIT), Kharagpur

July 2019 - May 2023

Bachelor of Technology - BTech, Electrical Engineering

CGPA: 8.12 / 10

EXPERIENCE

Software Development Engineer (Backend)

Aug 2023 - Present

Jio Platforms Limited

Mumbai, Maharashtra

- Developed core backend modules of **JCMS**, a **microservices**-based CRM platform with **125+** services, supporting telecom customer lifecycle management and partner/agent onboarding.
- Built **REST APIs** using **Java**, **Spring Boot**, **JPA**, and **Oracle DB** with server-side pagination, dynamic filtering, and parameterized queries to ensure secure and efficient data access.
- Implemented authentication and authorization using **Spring Security** with **JWT**-based stateless sessions, role-based access control (RBAC), **BCrypt** password hashing, and account lockout mechanisms.
- Designed **Redis-based caching** and **distributed locking** for concurrency control, and implemented asynchronous intra-system communication using **Redis Streams** and Lists to decouple tightly coupled workflows.
- Implemented centralized **audit logging** using JPA Entity Listeners for field-level change tracking and Servlet Filters for API request/response tracing, enabling end-to-end observability across services.
- Developed **Spring Batch**-based bulk processing utilities with chunk-oriented execution, automating **20+** operational workflows and reducing manual operational effort.
- Integrated **Kafka**-based asynchronous event publishing and built a config-driven notification framework for automated IDoc generation, enabling real-time data exchange with downstream systems.
- Built an internal DevOps automation tool leveraging JGit and **Azure DevOps** REST APIs for bulk repository modifications and automated **CI/CD** pipeline orchestration, reducing release cycle time from **hours to minutes**.

Software Development Intern

Jun 2022 - Aug 2022

Fiserv India Pvt. Ltd.

Bengaluru, Karnataka

- Contributed to backend development of the Opay tool using **Java** and **Spring Boot**, working on server-side components involved in financial transaction processing.
- Worked on storage and modification of user details in Registration and Provisioning Details in server-side files.
- Developed a utility to validate input data and generate required JSON and XML files for transaction processing.

PROJECTS

URL Shortener Service | *Java, Spring Boot, MongoDB, Redis*

- Built a URL shortening backend supporting short-link creation, low-latency redirects, click tracking, and fixed expiry.
- Implemented collision-free short-code generation using Base62 encoding with a MongoDB atomic counter, optimized via batch ID allocation to reduce database calls under load.
- Optimized the redirect path using an atomic Redis server-side script for expiry validation and click updates, and implemented a dirty-set sync mechanism to persist only active click counts to MongoDB.
- Added IP-based rate limiting, centralized exception handling, structured logging, and graceful fallback to MongoDB when Redis is unavailable.

TECHNICAL SKILLS

Languages: Java, C++, C, SQL

Frameworks: Spring Boot, Spring Security, Spring Batch, Spring Data JPA

Databases & Messaging: Oracle DB, MySQL, Redis, Kafka

Tools & Platforms: Git, GitHub, Azure DevOps, Maven, IntelliJ IDEA, Cursor, Postman

ACHIEVEMENTS

- Awarded an A* performance rating for high-impact contributions at Jio Platforms Ltd during FY 2024–2025.
- Secured an All India Rank (AIR) of 2983 in JEE Advanced 2019, placing among the top 2% of candidates nationwide.
- Achieved a 99.86 percentile and an AIR of 1695 in JEE Mains 2019, outperforming over 12 lakh aspirants across India.
